

# ***Wineries***

Electricity powers many of the core operations of a winery, including:

- Refrigeration's – 39%
- Processing equipment – 24%  
(Including pumps, fans, bottling and packaging)
- Lighting – 24%
- Compressed air – 8%
- HVAC – 7%
- Other applications – 8%

KEEN is proud to partner with the Michigan Wine Collaborative, an organization committed to making sustainable agricultural practices accessible to wineries across the state.

A winery that harvests solar energy to power its operations can substantially reduce energy expenses.
